

1 in 4 Teens Crashes in their First Year Driving

Will Yours Be the One??

Bring your young driver to the New Driver Car Control Clinic

85% of crashes involving a 16-year-old, and 75% of those involving a 17-year-old are attributed to "Driver Error." Not Speed! Not Drugs! Not Alcohol! They simply were never taught what to do in an emergency. The New Driver Car Control Clinic® teaches teens and their parents life-saving emergency response techniques. These life-saving skills are ***not*** taught in traditional driver's education. **The clinic is coming to Johnstown on October 14, 16, & 17, 2010. Go to www.carcontrol.com and click on Johnstown, PA for more information.**

What Parents Say...

"The best money I ever spent."

"This was definitely the best 6 hours of time spent with my daughter I recommend this class to everyone who drives a car, period. It could save your life."

"This Clinic has more than paid for itself."

- Defensive Driving Skills
- Accident Avoidance Maneuvers
- Brake Management
- Steering Management
- Eye Management
- Wet Weather Driving
- In-Car Instruction
- 56-Page Workbook
- 45-Minute Video
- Certificate of Completion

Teens need at least a Learner's permit. Tuition is \$179 per parent-student team. Upon completion receive a \$50 rebate from Conemaugh Trauma Services bringing actual cost to **\$129!** A parent is required at both the class and the hands-on driving session.
